

Code-Layout, Readability and Reusability

Date	01 October 2026
Team ID	SWTID-2026-4323
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Flow Designer's visual editor keeps the trigger, actions and conditions in a consistent structure.
2	Proper File Structure	Files and folders are logically organized	Yes	Flow, trigger, actions and the Standard Laptop catalog item are organized by purpose.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Flow and record names (e.g., Standard Laptop Task Flow, Catalog Task) describe what they do.
4	Function / Method Names	Functions are descriptively named	Yes	Flow actions are named by purpose: create the task, set the description, assign to Hardware.
5	Code Comments	Inline and block comments explain logic	Partial	The task short description ("Laptop need to Configured") explains intent; flow descriptions can be expanded.
6	Modular Design	Code is split into reusable functions/modules	Yes	Automation is one flow, separate from the catalog item, and can be attached to other items.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Unnecessary process automations were removed from the catalog item.
8	Error Handling	Exceptions and errors are handled gracefully	Partial	Task is created only after approval; custom error handling relies on platform defaults.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Standard Laptop Task Flow	ServiceNow Flow Designer	Other catalog items that need approval-based task creation	High
2	Catalog Task creation and Hardware assignment actions	ServiceNow Flow Designer	Any request that must be routed to a fulfillment group	High
3	Approval condition	ServiceNow Flow Designer	Other approval-gated catalog requests	Medium
4	Standard Laptop catalog item	ServiceNow Service Catalog	Standard laptop orders from the Hardware catalog	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Flow, trigger, actions and catalog item are clearly organized.
Readability	4	Clear names and a visual flow make the logic easy to follow.
Reusability	4	The flow and its task actions can be reused for similar request types.
Documentation / Comments	3	Task description is clear; flow-level documentation can be improved.
Overall Score	3.75 / 5	Average of the four ratings above.
