

Coding & Solution

Date	01 October 2026
Team ID	SWTID-2026-4323
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Solution Summary

Field	Details
Repository Link / URL	Not applicable – ServiceNow Flow Designer implementation
Programming Language(s)	ServiceNow Flow Designer / JavaScript-based platform scripting
Framework(s) Used	ServiceNow Flow Designer, Service Catalog
Key Features Implemented	•Automated creation of Catalog Task after approval •Automatic assignment to Hardware group •Automatic update of short description and description • Standard Laptop service catalog integration • Approval-based task creation
Pending / Incomplete Features	Custom error handling and additional flow-level documentation can be improved
Setup / Run Instructions	1.Open ServiceNow, then go to Flow Designer 2.Create/activate the Standard Laptop Task flow 3.Configure the Service Catalog trigger 4.Create the Catalog Task 5.Set the description and Hardware assignment group 6.Attach the flow to the Standard Laptop catalog item through Maintain Items 7.Place a Standard Laptop order 8.Approve the request 9.Verify the generated Catalog Task

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Partial / No
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	No

Additional Notes / Comments:

The solution uses ServiceNow Flow Designer to automate the standard laptop procurement workflow. After a Standard Laptop request is approved, the flow automatically creates a Catalog Task, updates the task description, and assigns it to the Hardware group. This reduces manual intervention and helps ensure that laptop configuration tasks are generated promptly.
