

Project Executable Files

Date	01 October 2026
Team ID	SWTID-2026-4323
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	NA
2	README / Setup Guide	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL	Yes
7	APK / Executable binary	NA
8	Dockerfile / Containerization config	NA
9	Test files and test results	Yes
10	Demo video or walkthrough	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
Streamlining-IT-Procurement/
├── Project-Documentation/
│   ├── Problem-Statement.pdf
│   ├── User-Story.pdf
│   ├── Project-Planning.pdf
│   ├── Solution-Requirements.pdf ──┐
│   └── Solution-Architecture.pdf
├── ServiceNow-Implementation/
│   ├── Standard-Laptop-Catalog-Item
│   ├── Standard-Laptop-Task-Flow
│   ├── Service-Catalog-Trigger
│   ├── Approval-Configuration
│   └── Hardware-Assignment
├── Testing/
│   ├── Functional-Testing
│   └── Performance-Testing
└── Evidence/
    ├── Flow-Designer-Screenshots
    ├── Service-Catalog-Screenshots
    └── Catalog-Task-Screenshots
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	[ServiceNow Developer Instance URL]
Login Credentials (Demo)	ServiceNow developer account credentials
Platform / Hosting Provider	ServiceNow
Repository Link	Not applicable
Demo Video Link	[Add your uploaded/hosted demo video link]

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project:

ServiceNow Project Execution

1. Log in to the ServiceNow Developer Instance.
2. Open All and search for Flow Designer.
3. Open Flow Designer under Process Automation.
4. Open the Standard Laptop Task flow.
5. Verify that the flow is Active.
6. Open All > Maintain Items.
7. Search for Standard Laptop.
8. Open the Standard Laptop catalog item.
9. Verify that the Standard Laptop Task flow is configured.
10. Open Service Catalog > Hardware.
11. Select Standard Laptop.
12. Click Order Now.
13. Open the generated request.
14. Approve the request.
15. Open the Requested Item.
16. Scroll to Catalog Tasks.
17. Open the generated Catalog Task.
18. Verify:
 - Short description: Laptop need to Configured
 - Description: Laptop need to Configured
 - Assignment group: Hardware
19. Confirm that the task was automatically generated after approval.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The solution depends on the availability of the ServiceNow Developer Instance.	Ensure the developer instance is active before demonstration.
2	Custom error handling is limited and relies mainly on ServiceNow platform behavior.	Monitor Flow Designer execution details and improve custom error handling if required.
3	The workflow is designed specifically for the Standard Laptop procurement process.	The flow can be extended or reused for other catalog items requiring approval-based task creation.
