

Customer Journey Map

Date	01 October 2026
Team ID	SWTID-2026-4323
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 – Request	Stage 2 – Approval	Stage 3 – Configuration
Actions <i>What does the customer do?</i>	- Opens Service Catalog - Selects Standard Laptop - Places the order	- Waits for request approval - Checks request status - Approval is completed	- Waits for laptop configuration - Receives configured laptop - Starts using the laptop
Touchpoint <i>What part of the service do they interact with?</i>	- Service Catalog - Standard Laptop item - Order Now	- Requested Item - Approvals section - Request status	- Catalog Task - Hardware team - Laptop configuration
Customer Thought <i>What is the customer thinking?</i>	“I need a standard laptop.” “I hope my request is submitted correctly.” “When will it be processed?”	“Has my request been approved?” “How long will the approval take?” “What happens after approval?”	“When will my laptop be configured?” “Is the Hardware team working on it?” “When can I start using it?”
Customer Feeling <i>What is the customer feeling?</i>	- Hopeful - Expectant - Neutral	- Curious - Concerned about waiting - Expectant	- Frustrated if delayed - Relieved when configuration starts - Satisfied when ready
Process Ownership <i>Who is in the lead on this?</i>	Employee / Service Catalog	Approver / IT Procurement	Hardware Team / IT Procurement

<i>Opportunities</i> <i>How can we improve this stage?</i>	• Provide a simple catalog item • Make ordering straightforward • Clearly display request details	• Automate the approval process • Provide request status visibility • Trigger the next process automatically	• Automatically create a Catalog Task after approval • Automatically assign it to Hardware • Reduce manual intervention
