

Technology Stack

<i>Date</i>	01 October 2026
<i>Team ID</i>	SWTID-2026-4323
<i>Project Name</i>	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
<i>Maximum Marks</i>	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Technology Stack Details

<i>S.No</i>	<i>Architecture Component / Layer</i>	<i>Technology Chosen</i>	<i>Justification / Purpose</i>
<i>1</i>	<i>Frontend / Client-Side</i>	ServiceNow Service Catalog	Provides the user interface for employees to select and submit the Standard Laptop request.
<i>2</i>	<i>Backend / Server-Side</i>	ServiceNow Flow Designer	Automates the procurement workflow by triggering actions after the request is approved and creating the Catalog Task.
<i>3</i>	<i>Database / Data Storage</i>	ServiceNow Database / Platform Tables	Stores Requested Items, approval records, Catalog Tasks, and other ServiceNow records required for the workflow.
<i>4</i>	<i>Cloud / Hosting / Deployment</i>	ServiceNow Cloud Platform	Provides the hosted environment for the Service Catalog, Flow Designer, requests, approvals, and Catalog Tasks.
<i>5</i>	<i>Version Control & CI/CD</i>	ServiceNow Update Sets	Used to capture and move configuration changes between ServiceNow instances during development and deployment.
<i>6</i>	<i>Third-Party APIs / Other Tools</i>	ServiceNow Service Catalog & Flow Designer	Provides the required tools for submitting Standard Laptop requests, processing approvals, creating Catalog Tasks, and assigning them to the Hardware team.
